TECHNICAL SKILLS:

Programming languages (JavaScript, TypeScript, Ruby), **Frontend UI Libraries** (React, Redux), **Server-side Javascript** (Node.js, Express, Koa), **Styling languages** (CSS, SCSS, Tailwind, Styled Components), **Animation Libraries** (GSAP), **React Static Site Generators** (Gatsby, Next.js), **Web Frameworks** (Ruby on Rails), **Content Management Services** (Hubspot, Ghost.io, Contentful), **Testing Suits** (Jest, Mocha, RSpec, Cypress), **Marketing Analytics** (Heap, HotJar), **Querying Languages** (SQL, GraphQL), **Container Technologies** (Docker), **Cloud Platforms** (AWS, Heroku, CloudFront, Cloudflare), **Databases** (MongoDB, PostgreSQL, Supabase), **Package Management** (NPM, Yarn, Webpack), **Design System Technologies** (Storybook, Chromatic), **Other Technologies** (HTML, Figma, Mongoose, jQuery, Git)

WORK EXPERIENCE:

Timescale

December 2021 – February 2023

Web Developer *React, Javascript, Typescript, Gatsby, Docker, Tailwind, SCSS, Node.js, Koa, AWS, Github, Hubspot, Ghost, Heap, GSAP, Jest, GraphQL, Figma, Storybook + Chromatic*

- Collaborated with cross-functional teams to build, redesign, and maintain pages across all of our web properties including, web-splash, blog, docs, and forum which often involved complex javascript animations, required top level styling, all while keeping reusability and faster runtime in mind.
- Led initiatives to streamline the process for producing ad landing pages and a series of reusable components that could be quickly assembled in a matter of minutes with copy provided from stakeholders.
- Administered devOps using tools and technologies such as AWS, Github, Cloudflare, Docker, etc.
- Conducted A/B testing across various portions of our site, and created dashboards using Heap for the marketing team to better analyze user traffic and interactions.
- Developed and updated features on our backend web-endpoint to ensure a seamless submission process for all of our forms as well as integrating a myriad of tools and APIs.
- Showcases of my work at Timescale: [State Of Postgres](#) - [Community](#) - [About](#)

Claypoole Executive Search

March 2023 – July 2023

Freelance Web Developer *React, Gatsby, SCSS, AWS, Github, GSAP, Figma, GraphQL, CloudFlare*

- Developed the entire website from scratch after researching which tools, frameworks, and technologies would be most beneficial based on client needs. I decided to use Gatsby because of optimized performance for static sites, added benefits for SEO, there was no need for routing, and for more control over the build process of the site.
- Collaborated closely with a graphic designer to create a style guide as well as planning pages to maximize reusability while maintaining a modern and visually appealing look to the website.
- Administered site hosting on AWS S3 and security/distribution on CloudFlare to save cost and boost performance.

OrioleDB

June 2023 – Present

Freelance Web Developer *React, Gatsby, SCSS, AWS, Github, GSAP, Figma, GraphQL, CloudFlare*

- Developed the entire website from scratch and utilized technologies such as intersection-observer in order to lazy-load images which would decrease the initial load time of the site and provide a better user experience.
- Engineered a seamless git workflow via Github Actions to enable a dynamic testing environment that creates a unique version of the site for each pull request compared to main that enabled both the client and the designer to view/interact with the site before going to production to provide greater quality assurance.

EDUCATION:

App Academy

March 2021 – July 2021

- Completed a rigorous 16-week full-stack web development bootcamp with a >3% acceptance rate. The program provided in-depth training in cutting edge technologies including React, JavaScript, Python, and Node.js. We engaged in collaborative pair-programming sessions and executed real-world projects to gain practical experience in full-stack web development.
